

OBDLink™ Quick Start

1. Install drivers

Insert the software CD in your CD-ROM drive. The scan tool selection menu will automatically appear. Click on the icon labeled **OBDLink**:

If the menu does not appear, click **Start→Run**, type `D:\setup.exe` (where 'D' is the drive letter of your CD-ROM drive), and click **OK**.

The OBDLink menu will appear. Click on the driver link for your operating system and install the drivers:

2. Locate the diagnostic connector

The 16-pin D-shaped diagnostic link connector (DLC) should be located in the passenger or driver's compartment in the area bounded by the driver's end of the instrument panel to 300 mm (~1 ft) beyond the vehicle centerline, attached to the instrument panel and easy to access from the driver's seat. The preferred location is between the steering column and the vehicle centerline.

3. Connect scan tool to the DLC

Turn the vehicle's ignition to the **Key On, Engine Off** position. Follow connection diagram (bottom of page) to connect OBDLink to the diagnostic connector using the OBD-II cable (steps **A** & **B**).

*With step **A** completed, watch the LEDs as you are performing step **B**. The "STATUS" LED will glow red (or alternate between red and amber if the Bluetooth option is installed) and the Tx/Rx LEDs will cycle on and off in sequence from left to right.*

4. Connect scan tool to the PC

Connect OBDLink to your PC's USB port using the USB cable (steps **C** & **D**).

5. Install OBDwiz software

From the OBDLink menu click on **OBDwiz**, and follow the prompts to install the software:

6. Launch OBDwiz software

To launch the software, click on **Start→Programs→OBDwiz→OBDwiz**. Click the **Auto Detect** button, then click the **Connect** button.

Technical support

Should you run into problems, technical support is just a click away:

- **Knowledgebase** - contains answers to the most commonly asked questions, general information about OBD-II, and troubleshooting information.
- **Forum** - allows you to share information and get support from other ElmScan 5 users.

These resources can be accessed from our website: www.ScanTool.net
