

OBDLink™ S

Quick Start Guide

1 Install OBDwiz software

Point your browser to obdlink.com/software/

Download **"OBDwiz for Windows"**.
Run the installer to set up the software.

OBDwiz for Windows

2 Connect OBDLink S to the PC

Use the grey serial cable to connect OBDLink S to the PC's serial port.

— Using Windows XP or Vista? Download the drivers at obdlink.com/support/s

4 Turn ignition to "Key On, Engine Off"

Both sets of **Tx/Rx** LEDs will cycle on and off from left to right.

Vehicles with push button start: press the button without stepping on the brake pedal.

— LEDs off? Check OBD port, auxiliary port, and the cigarette lighter for blown fuses.

3 Plug OBDLink S into the OBD port

The OBD port is usually found on the driver's side, under the dash.

Can't find your OBD port?
Visit obdport.info

5 Launch OBDwiz software

Click **Start > Programs > OBDwiz > OBDwiz**.
When prompted, enter the license key.

OBDwiz™ License Key

6 Connect to your vehicle

Click the **'Connect'** button:

— Using Windows XP or Vista? Click **'Auto Detect'** first.
