

OBDLink SX Quick Start Guide

1 Install OBDwiz software

Point your browser to obdlink.com/software

Download "**OBDwiz for Windows**". Run the installer to setup the software.

OBDwiz for Windows

2 Connect SX to the PC

The LED will turn **yellow** when you connect SX to the PC's USB port.

- Red LED? Drivers were not installed properly.
- Using Windows XP or Vista? Download the drivers at obdlink.com/support/sxusb

3 Plug SX into the OBD port

The OBD port is usually found on the driver's side, under the dash.

Can't find your OBD port?
Visit obdport.info

4 Turn ignition to "Key On, Engine Off"

The LED will turn **green**.

Vehicles with push button start: press the button without stepping on the brake pedal.

— Yellow LED? Check OBD port, auxiliary port, and the cigarette lighter for blown fuses.

5 Launch OBDwiz software

Click **Start** > **Programs** > **OBDwiz** > **OBDwiz**. When prompted, enter the license key.

— License key can be found on an insert included with your purchase.

6 Connect to your vehicle

Click the '**Connect**' button:

— Using Windows XP or Vista? Click '**Auto Detect**' first.
